 GLOSTER
INSPIRED OUTDOOR
FURNITURE

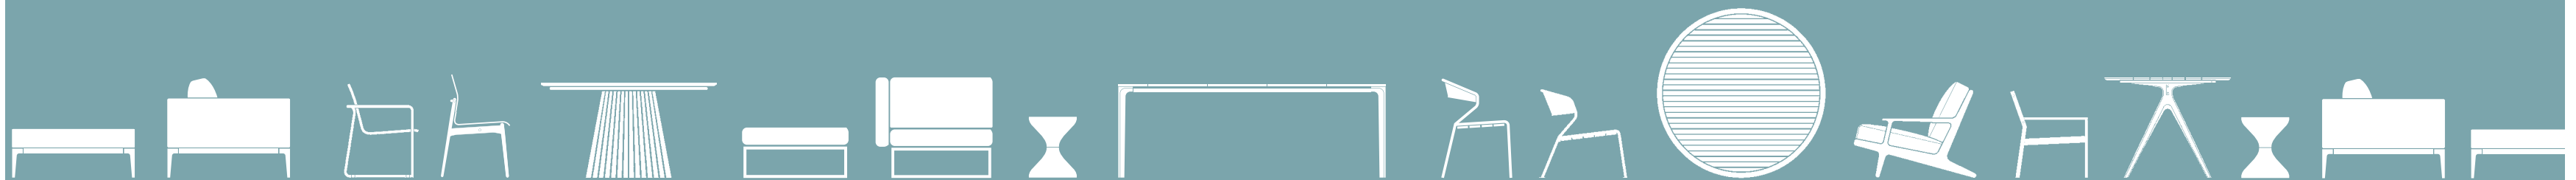

2016

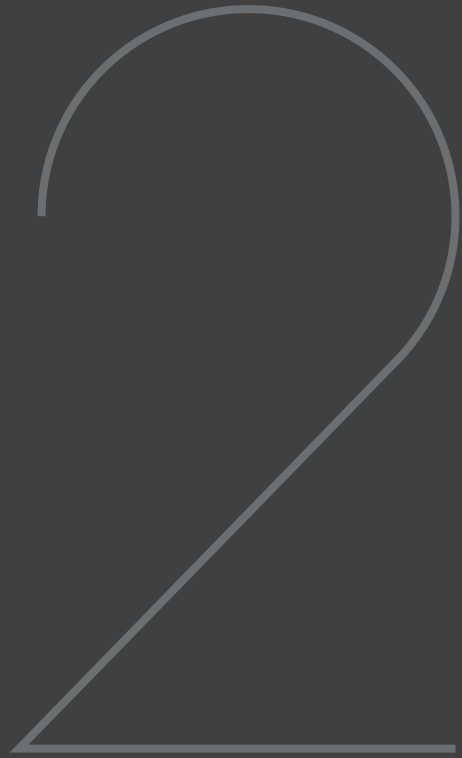

As life gets faster and more complex, the need for quality time and space - the freedom to be you - grows too.

At Gloster we open doors to timelessly beautiful exteriors where your furniture sets the mood, just the way you want it to be. And we take the long view, using only the very best materials and techniques available.

Our aim is your pleasure - to be enjoyed in countless special moments outdoors.

OUR HERITAGE

Gloster's roots can be traced all the way back to West Africa in 1960, where a band of passionate entrepreneurs and furniture makers took the first steps on a long journey. By the early 1970's, increased demand and access to plantation grown teak led us to move our factory to Indonesia. Today, the same passion, conviction and pride that launched the Gloster brand, continues to fuel our business. We may live in a different world than the one occupied by our founders, but one thing remains the same - we are furniture makers whose sole focus is to design and build the world's finest outdoor furniture. Because we believe.

06
07

TEAK

The benchmark hardwood for fine outdoor furniture for more than 700 years. With a beautiful buffed sheen or a soft natural finish, every piece of Gloster teak originates from carefully managed plantations and is thoroughly inspected to ensure that quality endures. A close-grained hardwood with a high natural oil content, teak is exceptionally hard wearing, highly resistant to rotting and almost impervious to the effects of sun, rain, frost or snow - the first and only choice of timber for outdoor furniture. Because it matters.

CRAFTS & INNOVATION

Gloster is bound to both history and a tradition of fine craftsmanship. Our furniture is not the result of random mass production - human hands have created every rounded corner and every joint. Our customers must be able to feel the link to themselves when they buy our furniture. There must be a common history present, and a narrative of the life that we love to live. The furniture must speak a language that we understand - a language that awakens our curiosity. But we do not wish to stagnate in the past. We look forward and outward, so the past and future merge into a bold present to which we can all relate. Because we believe.

PLANTATIONS

Transparency & honesty. Gloster's production of teak is characterised by our approach. We understand our resources and we know our wood. We only harvest what we have planted ourselves, and every tree that is felled was placed in the soil by one of the Gloster plantation's workers - workers whom we have known for a lifetime. A Gloster teak tree has a lifecycle of at least 50 years - and our wood can always be traced back to its origin. We believe that our customers must be able to trust us, so we treat the world, its resources and its people with respect. This is a core value at Gloster. Because it matters.

OUR DESIGNERS

Of course, great manufacturing is wasted without great design. Gloster currently works with several world-renown designers to create timeless outdoor furniture. Once a concept is approved, designers work closely with the development team at our factory to further refine their designs. And even in this digital age, we insist our designers travel to and spend time at our factory so they get to know our people, our raw materials and our philosophy. Because we believe.

TRUE
CRAFT HAS
MANY
FACES

Just like the oil in our teak, a passion for excellence runs through Gloster. From the timber technician through to the CEO, each is a craftsman in their own way and each takes pride in their contribution to producing the world's finest outdoor furniture.

WILLIAM

Avant-garde, the vanguard - designs and ideas that are ahead of their time. Pushing the boundaries of the accepted status quo, avant-garde brings new and experimental ideas and methods to the fore. Cutting edge design, innovative materials and the application of new techniques combine to create pioneering furniture collections for the modern era.

MIX & MATCH

The freedom of choice is yours...

Confident styling and a strong, simple colour palette combined with a sophisticated fabric selection, means that the Gloster 2016 collection is more dynamic than ever. Experiment with different frame colours and fabrics, table sizes and top materials to find the configuration that perfectly fits both your style and your space.

VOYAGER LOUNGE

Inspired by the campaign furniture from the colonial era, the Voyager collection evokes a contemporary look with a vintage allure. Portable, practical and with a fresh, seaside colour palate, each item is engineered to quickly assemble for use, then fold or break down for storage or transport in accordance with the classic campaign style.

VOYAGER GLOW

Enjoy outdoor living even after the sun goes down. Portable, remote controlled illumination with style, but without strings. Charge during the day and use at night to create the perfect mood.

OUTDOOR
LOUNGE
GRID
BLOC
CLOUD
WEDGE

The ultimate expression of outdoor living. Outdoor Lounge offers indoor style and comfort in an outdoor product. As with all the best ideas, simplicity is the key with highly modular seating units providing the building blocks for each collection. This simplicity allows a wide number of different units to integrate together to create almost limitless design possibilities.

GRID LOUNGE

Grid - a name that describes both function and mind-set. A grid of complementary units forms the basis of a totally flexible seating system where you can combine various individual elements to meet your specific needs.

STANDARDS
TEAK TABLES

The benchmark hardwood for fine outdoor furniture for more than 700 years, teak is a beautiful golden brown, close-grained timber with a high natural oil content. Exceptionally hard wearing, highly resistant to rotting and almost impervious to the effects of sun, rain, frost or snow, teak is the first choice timber for outdoor furniture.

At Gloster, we use only the finest plantation grown teak, which is carefully nurtured an average of 50 years before harvesting.

CASA
LUNA
NOMAD
VISTA

Metal furniture, whether stainless steel or aluminium is the modern choice for those seeking practicality, style and comfort. A marriage of durability and beauty, our metal collections utilise an electro-statically applied powder coat finish, which completely blankets the surface of each piece. The result is a deep, rich finish that is extremely durable, corrosion resistant and virtually impervious to moisture.

All the depth, texture and richness of natural materials in a remarkably durable synthetic fibre. Our entire woven range is handcrafted using lightweight, corrosion resistant powder coated aluminium frames clad in the highest quality manufactured fibre. Soft to the touch, this remarkable polyethylene material is completely weatherproof and resistant to both tears and ultraviolet light.

PARASOLS

When choosing exactly the right outdoor furniture for your particular needs, function is just as important as style. In the following pages we have listed details of the various materials and fabrics we use for our furniture to help you plan your selections in detail. Further technical information, including downloads and care & maintenance instructions are available on our website www.gloster.com

Natural Finish Teak

Buffed Finish Teak

Powder Coated Aluminium & Stainless Steel

Brushed Stainless Steel

MATERIALS

In addition to teak, we use a wide variety of other materials in the production of our furniture. Extensive use is made of powder coated stainless steel & aluminium, man-made wicker and sling material and there are specialist departments within our factory entirely devoted to the working of these materials to the same high standards as our teak components.

Ceramic

Black Stone

Black HPL

Weathered Teak

NATURAL FINISH TEAK

Teak's tight grain and high oil content make it exceptionally resistant to the elements. At Gloster, we use only the finest plantation grown teak, which is carefully nurtured an average of 60 years before harvesting. After more than 50 years and 10 million pieces of furniture, we have seen our responsible forestry practices not only serve the environment but also contribute to the growth of a superior lumber product.

BUFFED FINISH TEAK

Our buffed finish utilises a wet sanding and buffing process that yields a luxuriant shine. Sanded to a smoothness beyond that of our natural teak, the buffing process heats the natural oil of the teak, draws it from the timber and spreads it across the surface resulting in a lustrous polish-like finish that is 100% organic. Exposed to the elements buffed surfaces will turn the beautiful grey patina of standard teak, yet when protected from moisture and ultraviolet they will retain their buffed sheen.

POWDER COATED ALUMINIUM & STAINLESS STEEL

Our aluminium and powder coated stainless steel collections both utilise an electro-statically applied polyester powder coat finish, which completely blankets the surface of each piece. The result is a deep, rich finish that is extremely durable, corrosion resistant and virtually impervious to moisture.

BRUSHED STAINLESS STEEL

Crafted from 304-grade stock, Gloster Stainless Steel represents the industry standard for quality and design. The electropolished surfaces of each piece yield a lustrous yet corrosion-resistant, low-maintenance finish. Electropolishing is an electrochemical process whereby the combination of an electrical current and a strong acid removes much of the iron from the surface of the steel, which leaves a lustrous, shiny surface and greatly enhanced corrosion resistance.

MAN-MADE WICKER

Our entire Woven range is handcrafted using lightweight, corrosion resistant powder coated aluminium frames clad in the highest quality manufactured fibre. Soft to the touch, this remarkable polyethylene material is completely weatherproof and resistant to both tears and ultraviolet light.

CERAMIC

Gloster ceramic table tops are made from a double-layer ceramic slab. Whilst the name suggests fragility, ceramic is actually harder than granite and is workable using techniques normally applied to glass and natural stone. Ceramic table tops are chemical resistant, fireproof, UV and heat resistant. Water absorption is close to zero, therefore, table tops are also completely frost-proof and weather resistant.

HPL

HPL (High Pressure Laminate) is a flat panel derived from thermosetting resin, which is reinforced with wood-based fibres and manufactured under high pressure at high temperature. We use only the highest grade of HPL to ensure exceptional resistance to ultraviolet light, moisture and weather. Regardless of surface colour, HPL edges will always be black. And, while HPL is highly scratch resistant, deep scratches will reveal its black core colour.

ACRYLIC STONE

Gloster acrylic stone table tops are comprised of approximately 30% acrylic resin and 70% aluminium hydroxide, a natural mineral obtained from bauxite aluminium ore. The inventive combination of acrylic, natural minerals and pigments produces an even coloured, non-porous, surface that combines elegant sophistication with exceptional heat, impact, scratch and ultraviolet light resistance.

THE TEAK STORY

A luxury timber valued both for its beauty and strength, teak is indigenous to just four countries in the world - Burma, Laos, Thailand and India. However, due to excessive, unsustainable logging over the past century, natural teak forests have practically disappeared in all of these countries except for Burma.

Fortunately for the world, teak continues to flourish in plantations throughout South and Southeast Asia, Africa and Latin America. It is from the well-managed, Indonesian plantations of state-owned Perum Perhutani, on the island of East Java, that we source our teak.

We asked Molyono, the Sawmill Manager at our factory in Indonesia, to fill us in on a few interesting facts about the plantation teak we use to make our furniture...

What is so challenging about sourcing teak?

Teak is one of the most sought after timbers for high end furniture production and as such there is a growing Global demand. Teak is not indigenous to Indonesia, it was brought to Indonesia by the Buddhist monks in the 16th Century from Burma and it was then expanded into larger plantations by the Dutch to service their ships plying the Dutch East Indies spice routes.

All Indonesian teak comes from plantation sources controlled by Perum Perhutani, the government body that controls all the plantations across Indonesia.

To ensure Gloster can obtain sufficient teak resource, we have a team of 22 graders who spend the majority of their time travelling to over 30 different locations across Java to select the ideal logs for our production. When selecting logs, our graders select the best logs with the fewest natural defects. This way, we ensure we obtain the best quality and yield recovery to maximise this valuable resource.

What's the ideal conditions for a teak plantation in Indonesia?

Teak trees are not indigenous to Indonesia but the climatic conditions on Java are ideal for growing teak. Teak grows best in sub-tropical conditions with temperatures ranging between 17 - 43 Celsius and with an annual rain fall of 1250 - 3750mm. In Java, teak can grow on a variety of soils, but for the best results, it needs moderately fertile soil with humus rich top soil - well aerated and free draining.

How would you characterise the teak wood in general?

Teak is widely known as the most valuable tropical hardwood and is mainly used for luxury furniture, ship and decorative building purposes. With its high natural oil content, teak withstands extreme weather conditions and is extremely stable once properly seasoned by kiln drying.

How can you identify the perfect Indonesian teak wood in terms of age, appearance & oil content?

Symmetrical in shape with limited surface defects such as knots and scaring. We look to choose logs that have a thin sapwood layer, which normally also goes hand in hand with a tree that has grown at a slower growth rate, meaning higher levels of density and oil content. We only choose logs with a minimum age of approximately 35 years and upwards to ensure the timber is of sufficient quality, whereas other companies use teak which is only 10 years old and has little density or oil content.

Any other stories to tell about teak wood on Java?

Teak plantations are really no different than any other crop, except that the growing cycle is far longer. It can take anything from 35 to 50 years for a teak tree to fully mature - Teak is a noble material and not something that can be rushed! The teak plantations in Java have been managed over countless generations by Perum Perhutani, and today their plantations comprise some 1.1 million hectares of teak, making them the largest teak plantations in the entire world. Perum Perhutani also works extensively with local communities during the rotational plantation cycle, where they allow the villagers to plant crops during the spell period between harvests.

BUFFED TEAK & TEAK WEATHERING

210
211

Contrary to popular belief, natural finish teak furniture does not require any special maintenance routine or any additional protection apart from occasional cleaning. Left to age naturally outside, the colour will gradually change to a soft, silver-grey as the pigments in the surface layer of the wood begin to fade away. We recommend that you allow your natural finish teak furniture to weather this way and simply clean thoroughly once or twice a year with our cleaning products. Furniture may also benefit from an occasional light sanding to remove any raised grain and restore a smooth finish to the surface.

Gloster buffed teak benefits from an enhanced surface preparation procedure, where the natural oils already contained within the teak are brought to the surface and burnished to produce a rich sheen and a consistent colour.

Used outdoors, buffed teak will weather exactly the same as natural finish teak when exposed to the elements. After the first few exposures to water, you should expect the surface grain to rise slightly, but there will be significantly less raised grain on buffed teak than on natural finish teak. Over time, the natural teak colour will also begin to fade away and the furniture will gradually weather to a soft, silver-grey.

CARE & MAINTENANCE

Someone once said the best things in life are free. We love the sentiment but have to concede that some wonderful things come at a price and some things, no matter how perfect, demand attention. We know that you have invested in furniture designed to look great and endure and we have used our years of expertise to offer the best advice and products we can to ensure your furniture stays in the best condition for as long as possible. Like a car or home, a little care and maintenance will ensure your furniture continues to bring you pleasure year after year.

FURNITURE COVERS

214
215

Gloster outdoor covers are made from taupe coloured Weathermax, a heavy duty 100% solution dyed polyester material.

Weathermax is a performance cover material combining UV resistance, water resistance, breathability and durability. The ability of the fabric to breathe is essential in reducing dampness, heat build-up and condensation. This in turn reduces the chances of problems such as mould or mildew becoming present on the furniture underneath. We also add a 'breather' layer of Dacron where the covers are in contact with flat teak parts like table tops to further aid breathability.

With typical attention to detail, each cover is tailored to the unique dimensions of our product, ensuring a perfect fit. As well as covers for individual items, we also offer covers for all our stacking chairs, meaning that a single cover can be used for a stack of four chairs. For several of our modular furniture collections, adjacent covers are designed to zip together so the entire set can be covered without the need to separate each item.

All covers feature either a strap-and-clip connector or elastic seams to ensure security against wind.

PARASOLS

230
231

P10 8ft 10" ROUND PARASOL

D · 106 H · 103

Laminated 1.5" diameter saligna wood pole.
Stainless steel fittings.
Height Under Canopy : 86"
Height Under Canopy (Folded) : 42"
Suitable Parasol Bases : PB10, PB11, PC50

P20 11ft 6" ROUND PARASOL

D · 138 H · 103

Laminated 2" diameter saligna wood pole.
Stainless steel fittings.
Height Under Canopy : 86"
Height Under Canopy (Folded) : 29"
Suitable Parasol Bases : PB21, PB22, PC50

P21 11ft 6" ROUND TILTING PARASOL

D · 138 H · 103

Laminated 2" diameter saligna wood pole.
Stainless steel fittings & tilting mechanism.
Height Under Canopy : 86"
Height Under Canopy (Folded) : 29"
Suitable Parasol Bases : PB21, PB22, PC50

P22 11ft 6" x 8ft 6" PARASOL

W · 138 D · 102 H · 103

Laminated 1.5" diameter saligna wood pole.
Stainless steel fittings & tilting mechanism.
Height Under Canopy : 79"
Height Under Canopy (Folded) : 12"
Suitable Parasol Bases : PB21, PB22, PC50

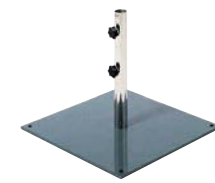

PB10 / PB20 ROUND BASE

D · 15.5

Powder coated, galvanized steel base plate.
Stainless steel tube.
Non-scratch plastic feet are removable, allowing base to be spiked into ground.

PB10 : Single Clamping Handle
PB20 :Twin Clamping Handles
PB10 Weight : 35lb
PB20 Weight : 37lb

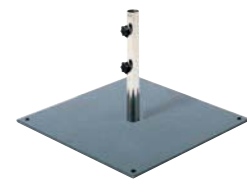

PB11 / PB21 SMALL SQUARE BASE

W · 25 D · 25

Powder coated, galvanized steel base plate.
Stainless steel tube.
Non-scratch plastic feet are removable, allowing base to be spiked into ground.

PB11 : Single Clamping Handle
PB21 :Twin Clamping Handles
PB11 Weight : 92lb
PB21 Weight : 94lb

PB22 FREE STANDING SQUARE BASE

W · 33.5 D · 33.5

Powder coated, galvanized steel base plate.
Stainless steel tube.
Non-scratch plastic feet are removable, allowing base to be spiked into ground.
Removable carrying handles included.

PB22 :Twin Clamping Handles
PB22 Weight : 162lb

PC50 TABLE CLAMP

Stainless steel tube.
Two plastic sleeves provided with each clamp to facilitate the correct centring of 1.5" and 2" parasol poles.

PARASOL CANOPY COLOURS

PARASOLS

REDUCER RINGS - FLUSH FIT

D · 2.75

CODE : A50, A51
Polished brass or brushed stainless steel.

Eliminates movement between parasol pole and table.
To fit parasols with 2" pole diameter only.
See table below for applications.

REDUCER RINGS - SURFACE FIT

D · 2.875 / 3.125 / 3.75

CODES : A55, A56, A60, A61, A65, A66
Polished brass or brushed stainless steel.
(A65 & A66 available in polished brass only)

Eliminates movement between parasol pole and table.
A55, A60, A65, A66 : To fit parasols with 1.5" pole diameter.
A56, A61 : To fit parasols with 2" pole diameter.
See table below for applications.

REDUCER RINGS & PLUG - SURFACE FIT

D · 3

CODES : A68B, A68M, A68T, A68W
Powder coated aluminium.
Colours : Black, Meteor, Tungsten, White

Eliminates movement between parasol pole and table.
To fit parasols with 1.5" and 2" pole diameter.
See table below for applications.
